PROFILE

MERN Stack Developer skilled in React.js, Node.js, Express, and MongoDB. Experienced in building responsive web apps, REST APIs, and reusable UI components. Completed multiple full-stack projects integrating authentication, payments, and modern design. Seeking an entry-level role to contribute and grow in web development.

EDUCATION

M.Tech.: Computer Engineering , Vishwakarma Institute of Information Technology 8.6/10 CGPA	05/2023 – 05/2025
B.E.: Computer Engineering , Sandip Institute of Engineering and Management 8.0/10 CGPA	06/2018 – 05/2023

SKILLS

Frontend: React.js, JavaScript, HTML, CSS, Sass/SCSS

Backend: Node.js, Express.js, Python, Machine Learning

Database: MongoDB, Mongoose

Tools: Git, GitHub, Postman

PROJECTS

SP Engineering, React, JavaScript, HTML, CSS

- Engineered a responsive company website to showcase fire safety and EPCM services.
- Created 10+ reusable React components, reducing code redundancy by 40%.
- Implemented a desktop-first layout ensuring 95% cross-device compatibility.
- Enhanced UI with Framer Motion animations, increasing visit duration by 30%.

Pizppy Application, React, Node, Express, MongoDB

- Designed and deployed a full-stack pizza ordering app with user/admin dashboards.
- Integrated features like cart management, order placement, and secure payment flows.
- Developed 10+ reusable React components for consistent and responsive UI design.
- Implemented JWT-based authentication and Stripe integration for online payments.

Natours Application, MongoDB, Express, Node, Pug

- Built a tour booking platform featuring 25+ RESTful API endpoints.
- Structured 4 Mongoose schemas (user, tour, booking, review) for data efficiency.
- Created 12+ reusable Pug templates, cutting development time by 25%.
- Optimized API performance by 30% via indexed queries and efficient routing.

Omnifood Project, HTML, CSS

- Developed a responsive landing page for a food delivery service with 6+ structured sections.
- Applied modern typography and spacing techniques for clear, accessible layouts.
- Optimized responsiveness across 8+ screen sizes for seamless user experience.

Voice Control Arduino Robot, C++, Arduino, Hardware Components

- Constructed a voice-operated robotic vehicle enabling real-time, hands-free navigation.
- Achieved 95% command accuracy with <0.5s response time during testing.
- Assembled the system using low-cost components (<₹1500), demonstrating efficient hardware–software integration.

CERTIFICATES

- Node.js, Express, MongoDB & More: The Complete Bootcamp
- Machine Learning and AI Internship: 5G2LF-RT04E-1SK3S-K69M2
- Build Responsive Real-World Websites with HTML and CSS
